

The quality policy for Asicomo is:

Supply part components and finished silicone rubber products that ensure high customer satisfaction

via flexibility, agreed specifications, documentation and other demands which are agreed with the customer

Share knowledge and know-how

via value adding communication which ensures optimal solutions in the cooperation with the customer

Take care of our resources

By means of including our employees in the everyday quality work to ensure commitment and quality assurance on all levels in our organization and via everyday efficiency of processes and a constant focus on quality, and to minimize the use of resources to benefit the environment

Create lasting improvements

via continually optimizing of products and processes which create extra value for both parties
